

QTS 4.3.4

Photo Station 5.6

Smarter management
Of your memories

QNAP

Does this bother you?

1

Lots of photos after a trip. **How to organize and share them with friends?**

More photos!

At home...

Please send me
photos of me.

So difficult to
organize...

Does this bother you?

2

After importing photos from PC to NAS,
do I have to organize them again?

I finished organizing
photos and imported
them to NAS, but...

Do I have to
reorganize them?

Does this bother you?

3

Is there anything I need to know when I view and enjoy my collections?

Is Photo Station
easy to use?
And secure?

Here's the answer

Lots of photos after a trip. How to organize and share them with friends?

Here's the answer

2

After importing photos from PC to NAS, do I have to organize them again?

I use Lightroom to tag photos...

Photo Station supports **reading & writing EXIF/IPTC/XMP metadata**. You can view and edit existing metadata.

I organize photos by folders...

Let's use **Smart Album**. We will tell you how to convert folder structures to Smart Albums in a single click.

Here's the answer

2

After importing photos from PC to NAS,
do I have to organize them again?

NO

I use Lightroom

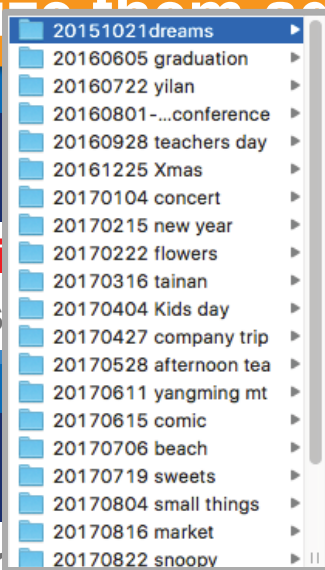

Photo Station supports **reading & writing metadata**. You can view and edit existing

/XMP

I organize photos by folders...

Let's use **Smart Album**. We will tell you how to convert folder structures to Smart Albums in a single click.

Read / Write metadata

Read EXIF / IPTC / XMP metadata in photos

Edit metadata in Photo Station and save changes to photos

EXIF/IPTC/XMP metadata

Date taken/Tag/
Description/Title/GPS

Photo Station

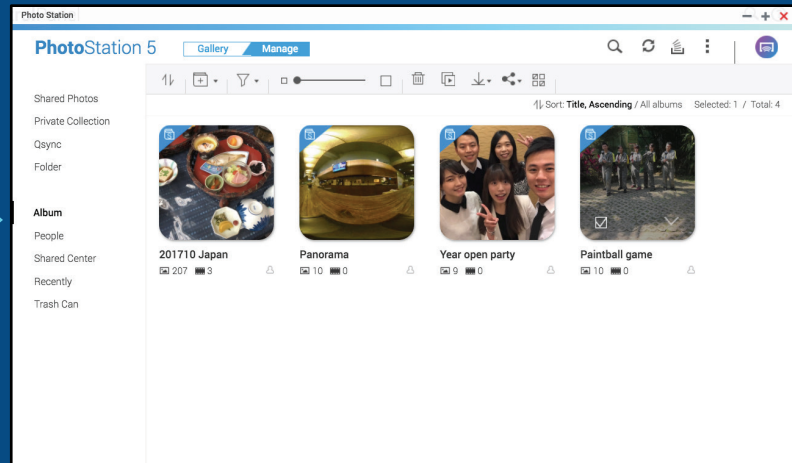

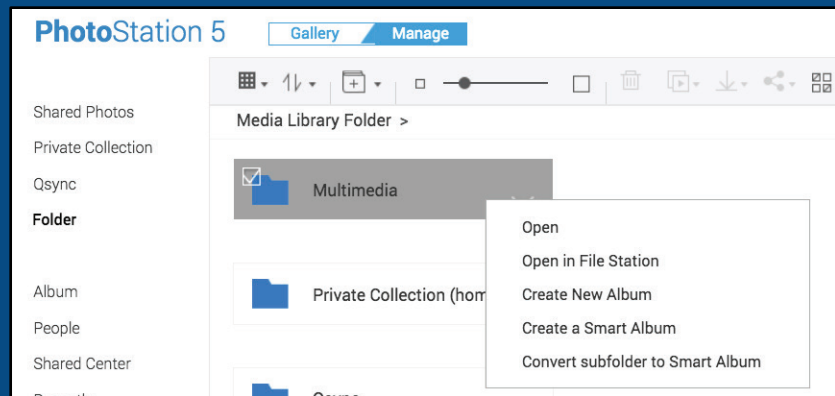

Convert folders to albums

Open Folder page and right click on the folder:

Create **New Album**

Create **Smart Album**

Convert subfolders
to **Smart Album**

Advantages of Smart Album

Customize permissions

Multiple search criteria

Search -> Smart Album

Map View

I like Smart Album!

Advantages of Smart Album

The screenshot displays the 'Create a Smart Album' interface. On the left, a sidebar lists various search criteria: Period, Random, Rating, Color Label, Tag, Title, File size, Dimensions, Camera brand, Description, People, and 'This day in history'. An orange callout box highlights this list. The main panel shows the 'Create a Smart Album' form. A circular callout highlights the 'Privilege settings' dropdown menu, which includes options: 'Only me', 'Only me', 'NAS users', and 'Public'. A blue speech bubble callout points to this menu with the text 'Customize permissions'. Below this, the 'File type' section shows 'Photo' and 'Video' checkboxes, with 'Photo' selected. Another blue speech bubble callout points to the 'Specify the search criteria' section with the text 'Multiple search criteria'. At the bottom right, there are 'Create' and 'Cancel' buttons.

Create a Smart Album

You can create Smart Albums with the following settings:

Album Name:

Privilege settings: **Only me** (dropdown menu)
Only I can browse and edit this album.

File type: ☒ Photo ☐ Video

Source Path: **Add**

Specify the search criteria:

Create **Cancel**

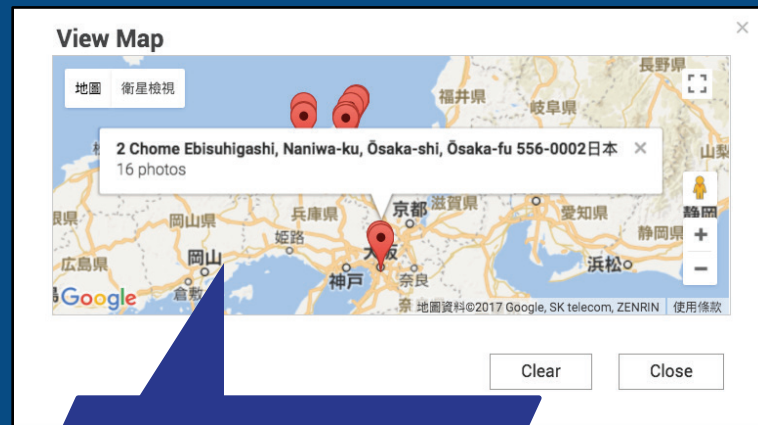

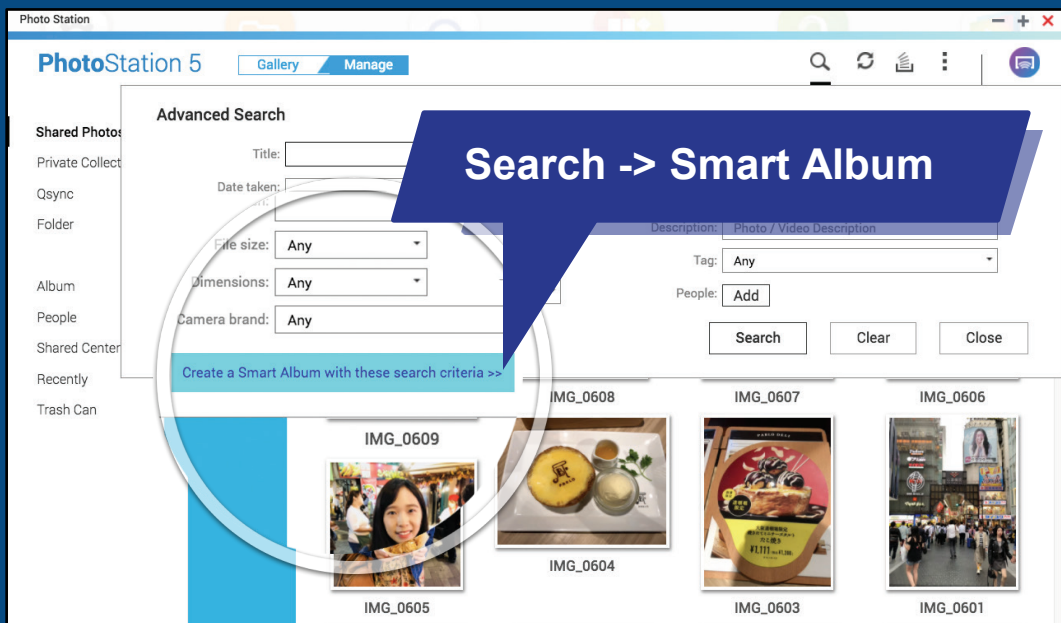

Customize permissions

Multiple search criteria

Search criteria list (highlighted in orange):

- Period
- Random
- Rating
- Color Label
- Tag
- Title
- File size
- Dimensions
- Camera brand
- Description
- People
- This day in history

3

Is there anything I need to know when I view and enjoy my collections?

To master photo management skills!

Improve transcoding performance -> **VLC Player**

Protect photos -> **Guests can't download**

More convenient to use -> **Hot Keys**

View uploaded photos -> **Set Media Folders**

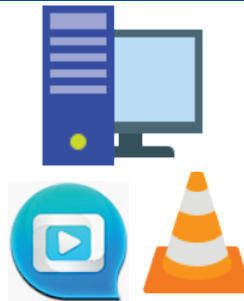

VLC Support

NEW

Play videos on NAS with VLC media player. Video playback is good even with ARM-based models. Video formats unsupported by NAS can as well be played.

Large video files

Unsupported formats

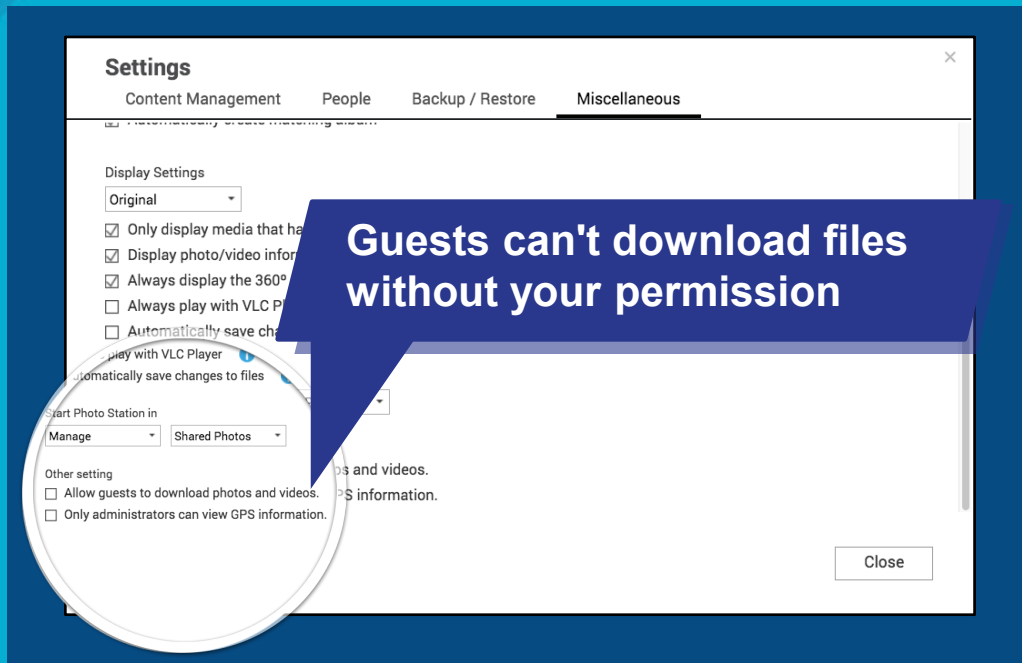

*Requires
QVHelper and
VLC installed
on PC

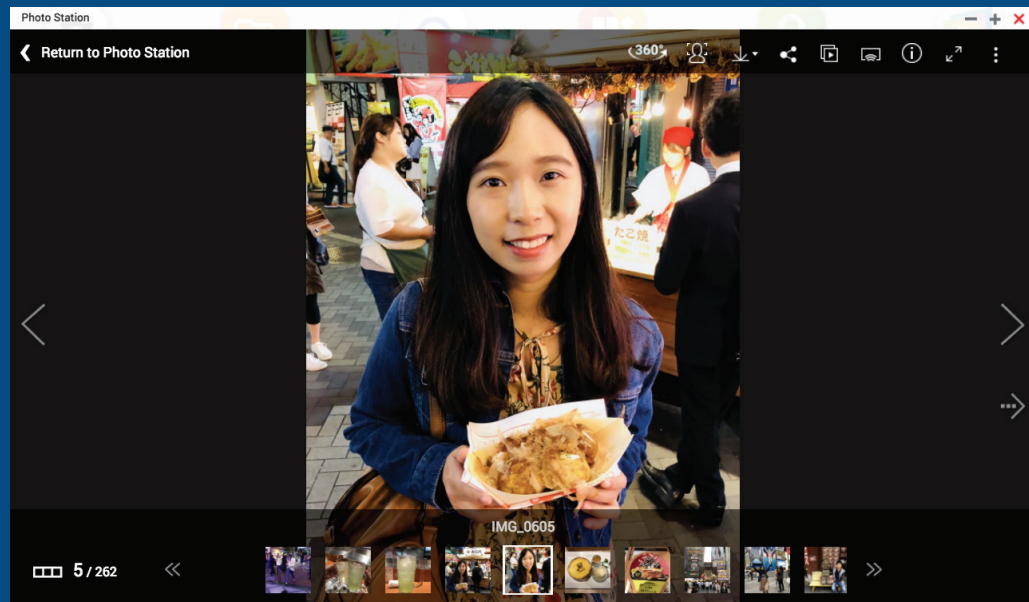

Video can
be played

Protect photos from thieves

Pro Tips: Use Hot Keys!

**A****Add to album****T****Add tags****I****Information****Esc****Close viewer**

Configure Media Folders before use

Settings

Content Management | People | Backup / Restore

You can select different folders to share folders as content sources for Photo Station. This is described in the [Content Management](#) section.

Select "Show" to see photos/videos in this folder.

+ Add

Folder	Photo	Video	Show	Remove
	☒	☒	☐	
	☒	☒	☐	
	☒	☒	☐	
	☒	☒	☐	

Save **Close**

Check "Photo" or "Video" to view certain types of media files

Folders with "Video" checked only won't appear in Photo Station.

Set folders as media folders to view photos and videos inside.

QNAP

Congratulations!
You're now a master of photo
management.
