Make File Management More Efficiently

Useful Tips in File Station

part 1

Handy Tool for Image Management

Have you ever had those concerns?

- It's not easy to create a photo collection.
- There are security/copyright concerns for sharing photo to others.
- It is hard to arrange massive amount of photos in the order you need.

Image2PDF is your helper!

- Easy image selection and fast creation.
- Easy to arrange the order of images.
- Three security measures.
- Multiple customizable options.

Easy image selection and fast creation

Choose images in File Station, and
open with Image2PDF

Open with Image2PDF

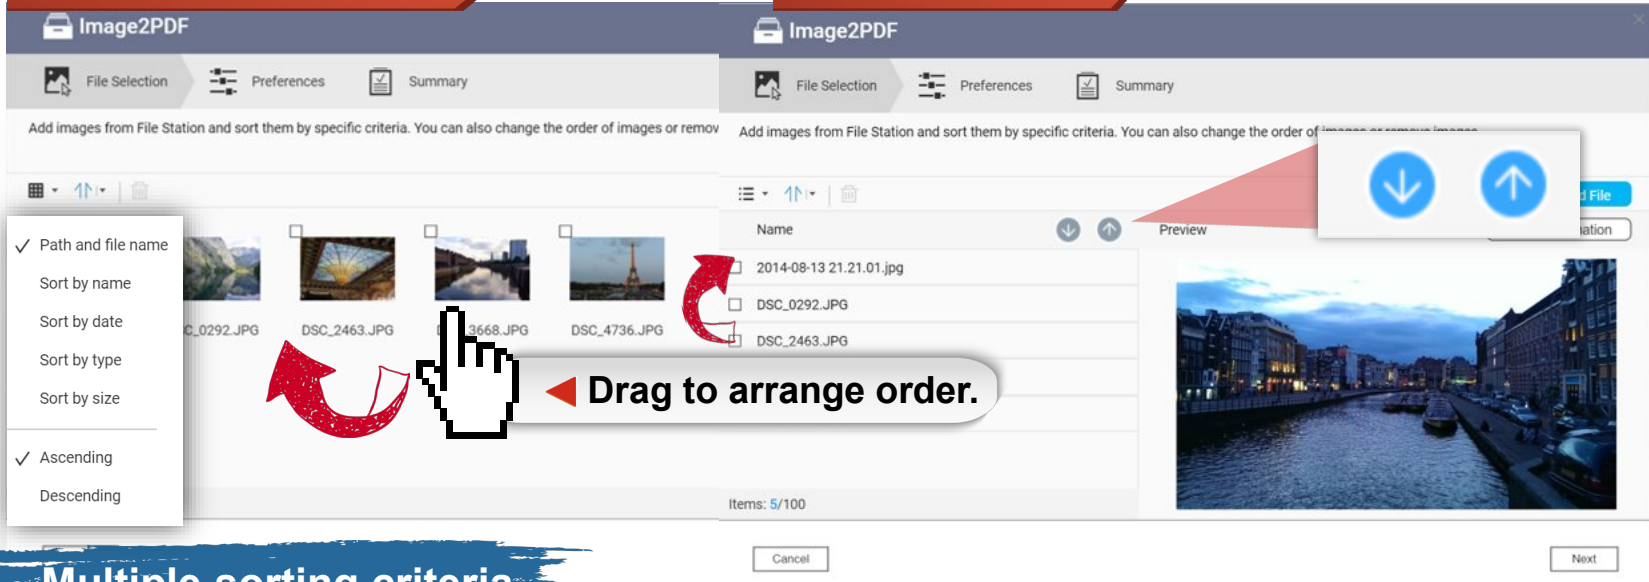

The screenshot displays the QNAP File Station interface. On the left is a sidebar with a file tree containing folders like 'home', 'Multimedia', 'Public', and 'Web'. The main area shows a list of files, including several JPEG images from a camera (DSC_0183.JPG to DSC_0942.JPG) and two larger JPEG files (DSC_1231.JPG and DSC_1293.JPG). A context menu is open over the file list, with the 'Open with Image2PDF' option highlighted in light blue. The menu also includes options like 'Create folder', 'Copy', 'Share', 'Download', 'Delete', 'Cut', 'Compress(Zip)', 'Snapshot Manager', and 'Properties'. At the bottom, there is a status bar showing 'Page 1 / 1', 'Display item: 1-22, Total: 22', and 'Show 50 Item(s)'.

File Name	Modified	Size
2014-08-13 21:21:01.jpg	2014/08	1.31 MB
☒ DSC_0183.JPG	2014/08	8.86 MB
☒ DSC_0249.JPG	2014/08	8.95 MB
☐ DSC_0292.JPG	2014/08	8.94 MB
☒ DSC_0316.JPG	2014/08	5.46 MB
☐ DSC_0394.JPG	2014/08	6.23 MB

**Prevent copying, printing; then encrypt.
Finally, share it!!**

Multiple customizable options

The screenshot displays the Image2PDF web interface, which is divided into two main sections: 'Basic' and 'Advanced'. The 'Basic' section includes fields for 'File name', 'Path', 'Orientation' (Portrait/Landscape), 'Page size' (A4), and 'Resolution' (Standard Resolution (150 dpi)). The 'Advanced' section includes fields for 'Header', 'Footer', 'File protection' (Prevent copying, Prevent printing, Encryption), 'Margin' (No margin, Narrow, Wide), and a 'Password' field. A red box highlights the 'Page, Date, Custom text' options for the Header and Footer fields. A central overlay lists the customizable options: File name, Path, Orientation, Page size, Resolution, Header, Footer, File protection, and Margin.

Handy Tool for Text Editing

Have you ever had those concerns?

You encounter an emergency case that you have to connect to remote server to modify settings.

**Install a new editor ?
That is waste of time.**

You find that there is no editor installed on the server.

**Windows notepad?
Not easy to use.**

You back up important files to NAS. Have you ever thought about...

**How to view or
modify code files that
are backed up to NAS?**

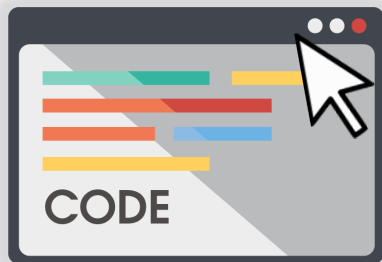

Need to fix some code.
But I have to download
and upload again...

Just want to quickly view,
but downloading takes
time...

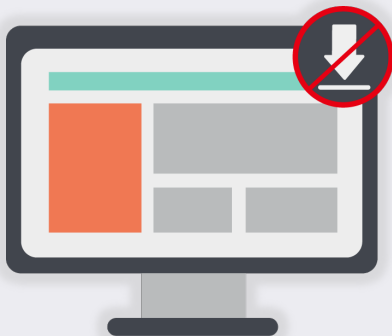

Text Editor helps you easily edit code/program on the NAS.

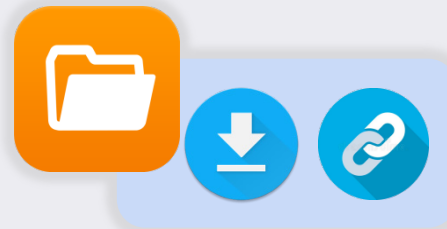

Convenience

No installation required

Save back to File Station

You can choose to...

Download then Upload	Connect with Samba	TextEditor 1.1.0
Complicated	Convenient to use (Need SMB support)	Convenience to use
no editor installed on the server	no editor installed on the server	 Familiar operation
When edited by multiple users, the latter might overwrite the former	When edited by multiple users, the latter might overwrite the former	 Newly added warning function to notify when multiple users are editing.

Text Editor 1.1.0 is your best choice.

Text Editor 1.1.0 is even smarter

**Split-screen mode
to edit different files
at the same time.**

**File status
notification**

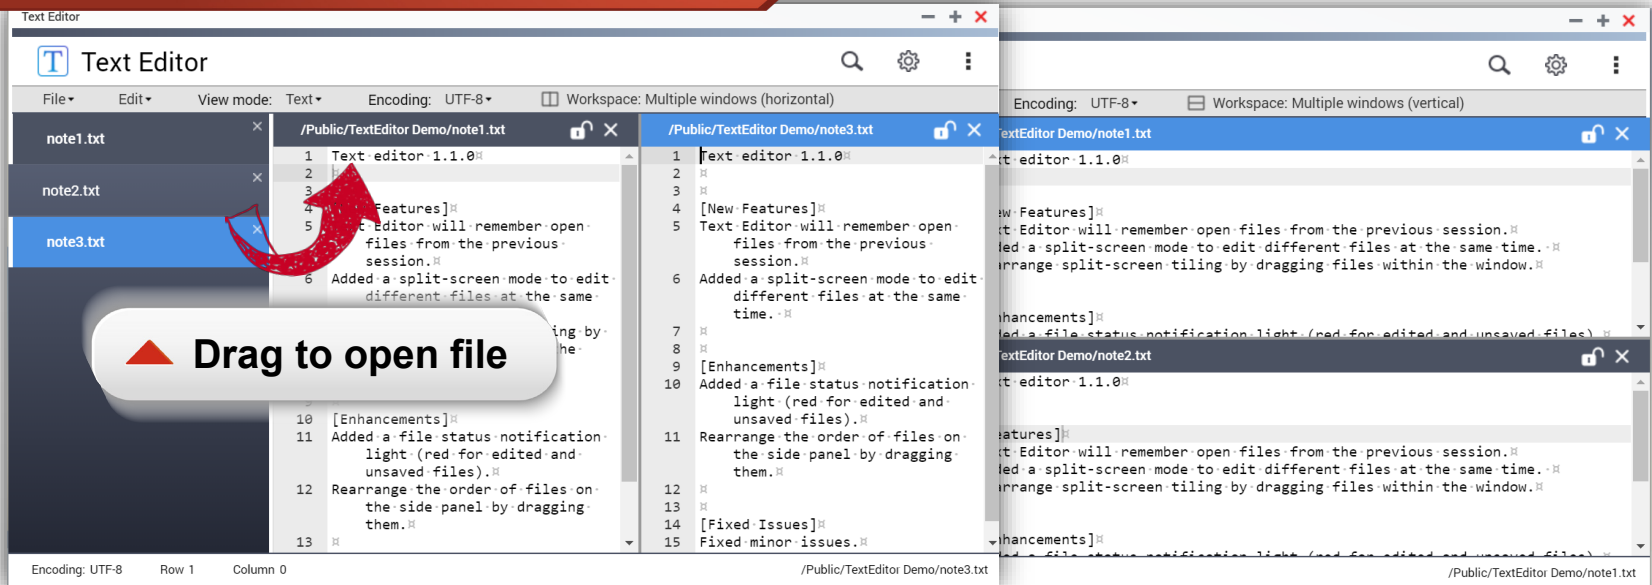

**Warning
for concurrent
editing**

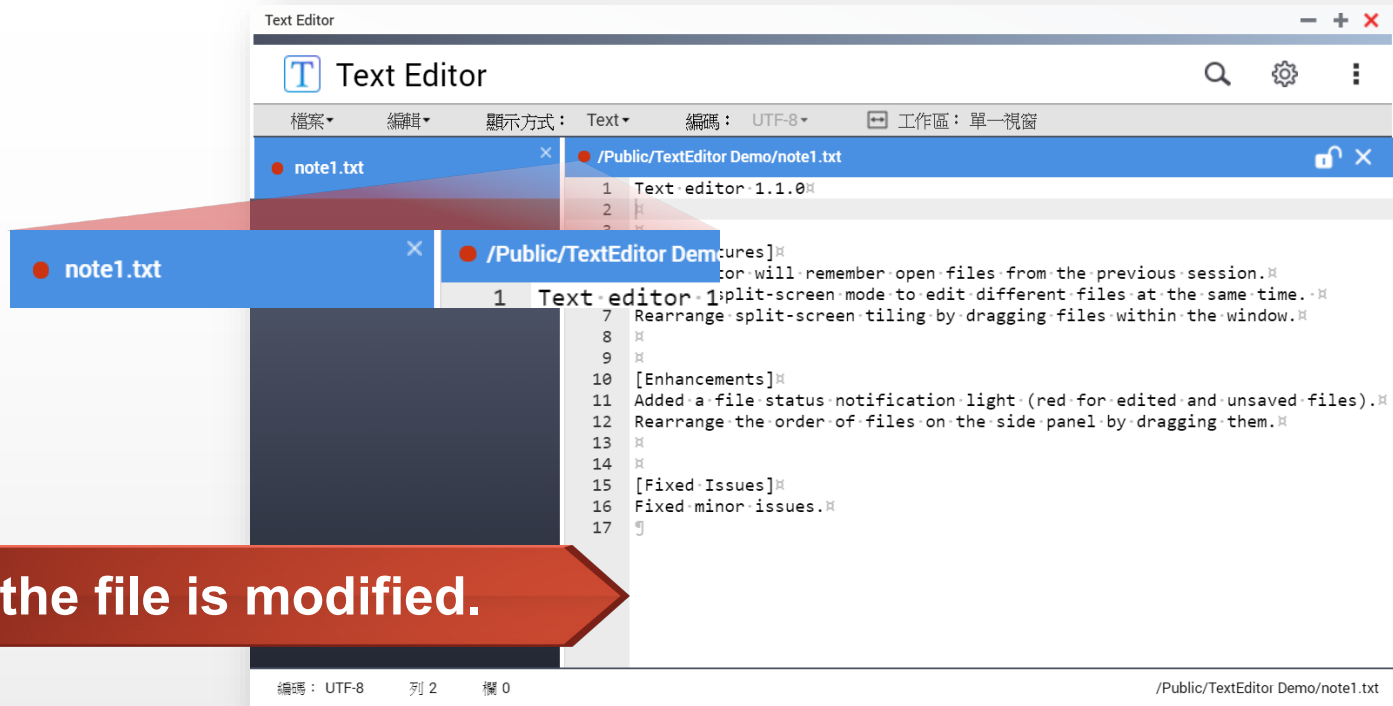

Split-screen mode

Notification Center

Stay on top of your NAS

When you are away from the NAS, have you ever worried about that...

- Hard disk bad sector information can not be immediately known, delaying rescue of important data?
- The system fan malfunctions and the temperature is getting higher?
- The network connection is unstable resulting to data access failure?

Importance of NAS status notifications

◀ **Health of your hard drive**

◀ **Backup and sync task status**

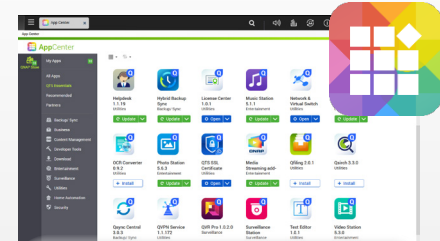

◀ **Network related information**

◀ **Hardware device status**

◀ **Storage and snapshot status**

◀ **OS/application update**

However, in the past, NAS notification settings are...

QNAP

E-mail SMS Push Service

SMTP Server

Select an e-mail account: Gmail

E-mail: dylanlin@qnap.com

Change account

Alert Notification

When the following system events occur.

☐ Warning ☐ Error ☒ Firmware Update

Send a notification to

E-mail address 1:

E-mail address 2:

▲

Inflexible and cannot support customized settings

How to set up different notification rules for different NAS users?

Can a notification rule support multiple delivery methods?

Can I just receive the specific notification message instead of all messages?

However, in the past, NAS notification settings are...

the content is difficult to understand due to the lack of multilingual support

Each application needs to be set independently and no centralized monitoring is available

Unable to check notification history after the message is sent

A man with dark hair, wearing a light-colored button-down shirt, is shown from the chest up. He has a thoughtful expression, with his hand resting on his chin and looking upwards and to the right. Above his head is a large, dark, scribbled circle, symbolizing confusion or a complex problem.

E-mail SMS Push Service

In QTS 4.3.5, notification functionality evolves!

Breaking past restrictions and continuously improving

Four benefits of Notification Center

1 Centralize all notifications and view notification status/history

2 Notification message supports multi-language with professional content proofreading

3 Full support for four delivery methods for all types of notification messages

4 Highly flexible notification rule settings and customized receipt scenarios

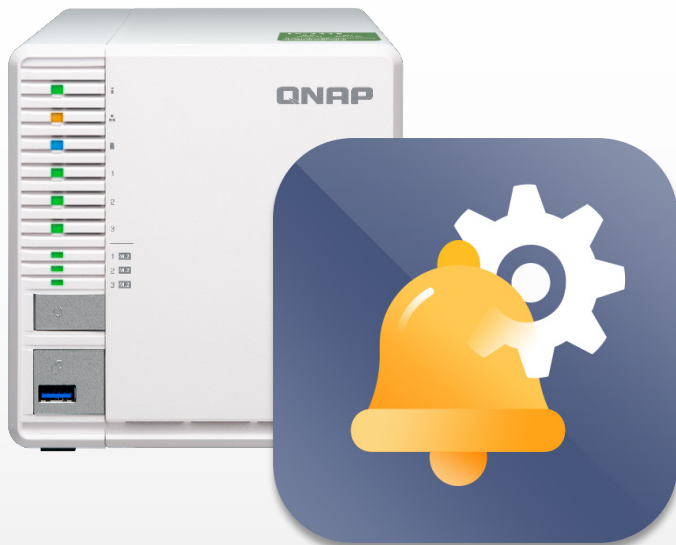

FEATURE 1

**Centralize all notifications and view
notification status/history**

The advantages of centralized settings

Share all notification service accounts and devices

Master all status/history of notifications

Notification data statistics presentation

Centralized notification control switch

Share all notification service accounts and devices

QNAP

Only need to set the notification service account once, and can be used by all applications!

The screenshot shows the QNAP Notification Center interface. On the left is an orange sidebar with icons for Overview, Queue and, and Global Notification Settings. The main area has a top bar with status for E-mail (2 Active), SMS (3 Active), Instant Messaging (3 Active), and Push Service (4 Active). Below this is a section for adding SMSC services, followed by a table of existing services.

Service Provider	Name	Action
nexmo	Nexmo - 1	[Icons]
twilio	Twilio - 1	[Icons]
clickatell	Clickatell - 2	[Icons]

Four red arrows point from numbered callouts to specific interface elements: 1 points to the Notification Center icon in the sidebar, 2 points to the 'Add SMSC Service' button, 3 points to the 'twilio' entry in the table, and 4 points to the 'Push Service' status in the top bar. A green download icon is on the right, and a server rack icon is at the bottom right.

Master all status/history of notifications

Settings

You can specify how long your notification records are kept and where they are stored.

Retention period

60 Days

Notification Center deletes notification records from the History section when the specified retention period is over. You can choose to keep the expired notification records on the NAS.

Keep expired notification records

☐ No

☒ Yes

Save to: /Public

Confirm

Cancel

Retention period settings

Advanced search

that Notification Center has sent. You can view details, resend messages, configure settings, and export the history as a CSV file.

SMS notification

- Support SMSC service:

- SMS feature:

Not limited to network connection, with high reliability and low latency, but require additional fee.

*Note: Please refer to each website for the billing plan and rate of the SMS.

Easy to set up SMS service in four steps

1 Choose your SMS provider

2 Register and get an API Key or Token from the website

3 Enter information in the notification center

4 Test send & Finish

The screenshot displays the 'Notification Center' web interface. On the left is an orange sidebar with navigation links: Overview, Notification Queue and History, Service Account and Device Pairing, System Notification Rules, and Global Notification Settings. At the bottom of the sidebar is a button labeled 'View the System Logs'. The main content area shows a modal dialog titled 'Add SMSC Service'. The dialog contains the following fields: 'SMS service provider' (a dropdown menu showing 'Clickatell - Communicator/Centr...'), 'Alias' (text input 'Clickatell - 1'), 'SMS server login name' (text input 'QNAP'), 'SMS server login password' (password input field with a toggle icon), and 'API ID' (text input field containing 'XXXXXXXXXXXXXXXXXXXXXXX'). There are 'Create' and 'Cancel' buttons at the bottom right of the dialog. A link 'How to sign up for an SMS account' with a user icon is also present. The background interface includes a top bar with 'Notification Center' and a right sidebar with a 'Push Service' section showing '4 Active' services.

Instant messaging notification

- Support Instant messaging:
