What is Qmiix

What is Qmiix

Qmiix is a solution that connects your apps and devices to automate your everyday tasks

Manages your small tasks so that you can focus on the bigger ones

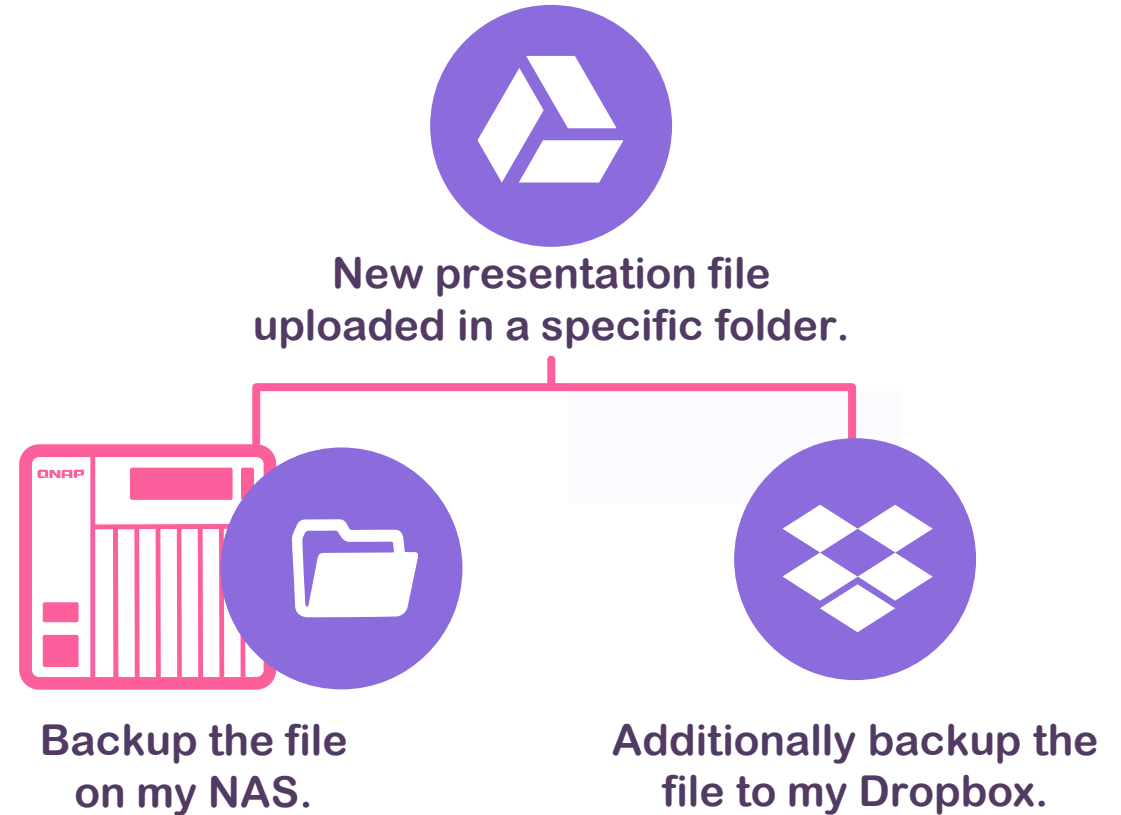

What is Qmiix

Step 1:
Qmiix can connect
with different apps

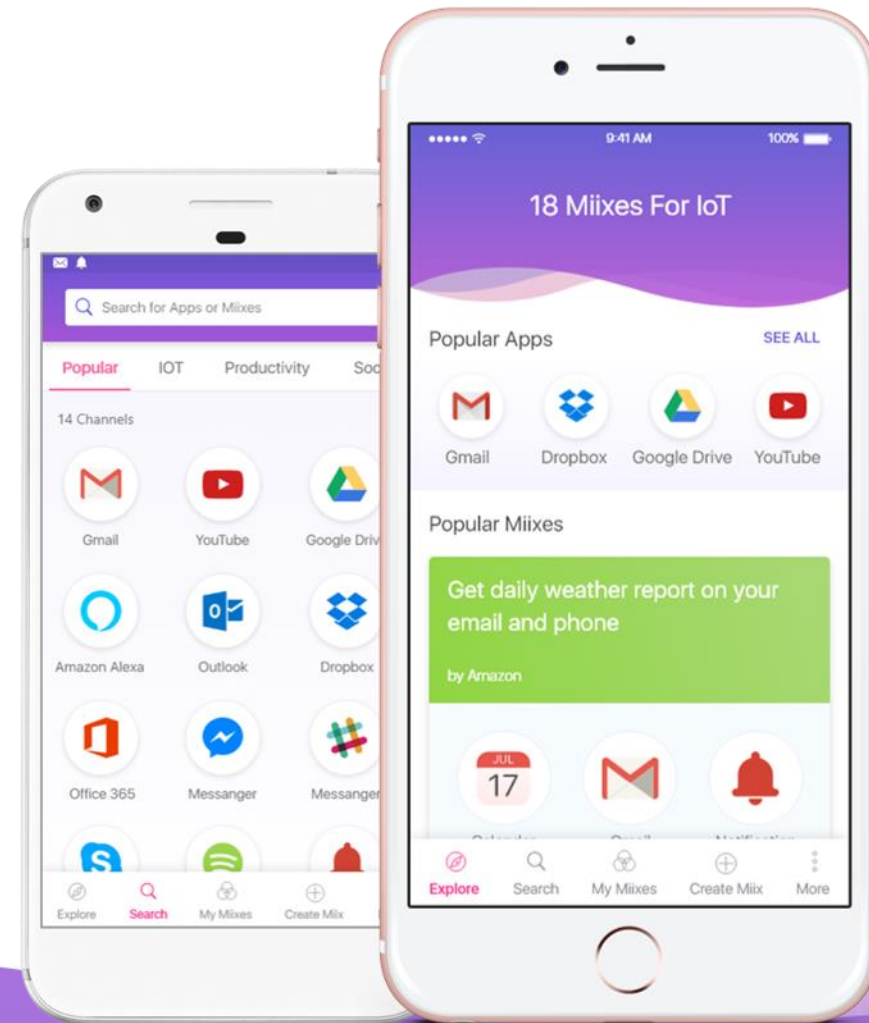

What is Qmiix

Step 2: Create workflows to boost productivity

Supported Platforms

- Web
- Android and iOS
- Create and manage your miixes
- Limited channels supported for mobile

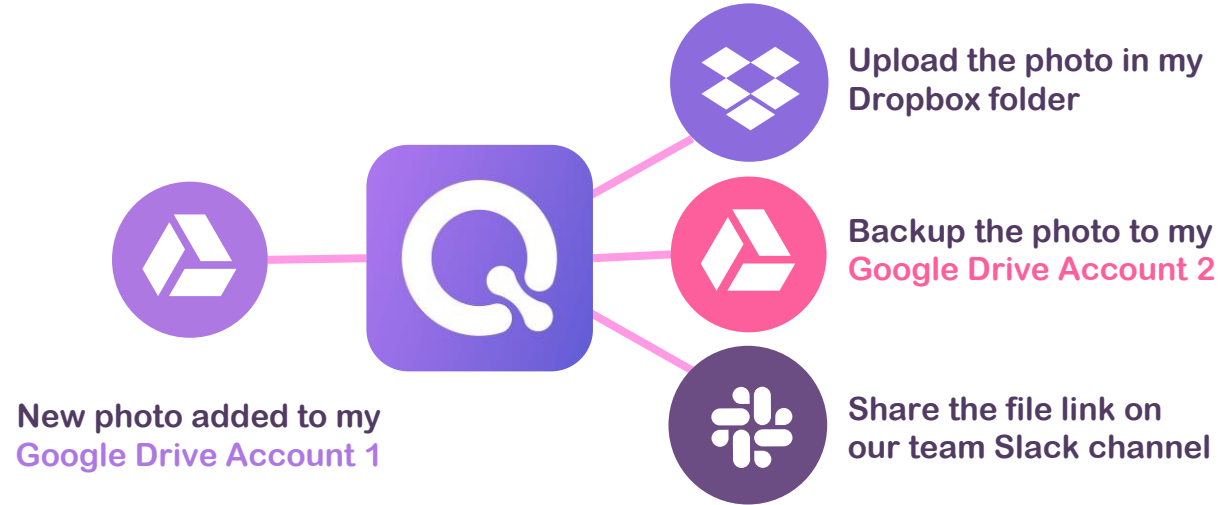

Why We Need Qmiix

Qmiiix brings different apps and devices together and hence bridges the gap

Why We Need Qmiix

- Gets more work done with fewer workflows
- Connects multiple accounts and devices

Saves precious time and supercharges productivity

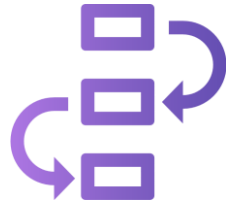

What Can Qmiix Do

What Can Qmiix Do

What is a Miix

A Miix is a combination of a Trigger and one or more Actions

Trigger
from one app

New file added to a specific
folder in Dropbox

Action(s)
from another or same app

Download file to
Google Drive

Qmiix Triggers

Trigger is a pre-defined condition which tells Qmiix to execute an action

App

Trigger
example

New file
uploaded in a
specific folder

Date and Time

Every day
at 8 a.m.

File station

A new file is
uploaded in a
Specific folder

Qmiix Actions

Action is an execution of pre-defined task within the specified app

App

Action
example

Post a message
using Line Notify

Post a message on
your Slack channel

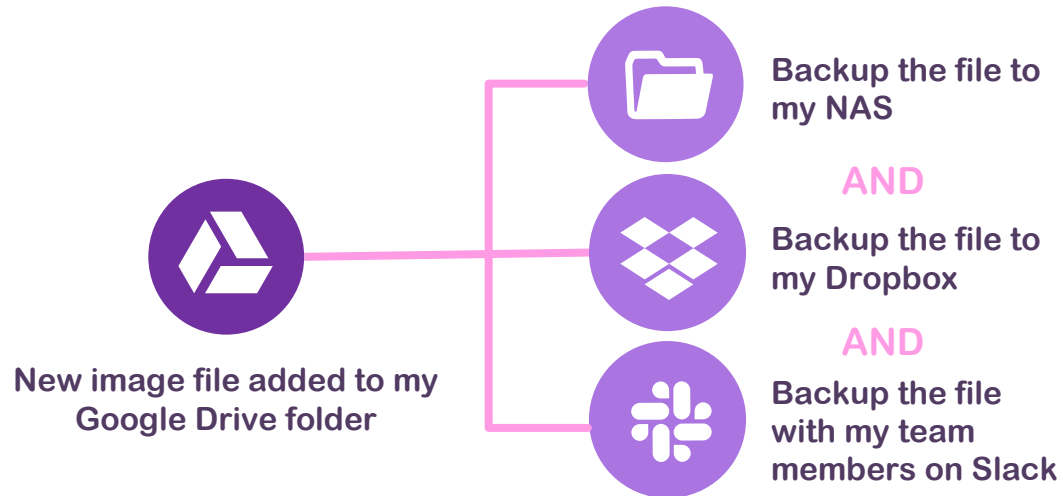

File station

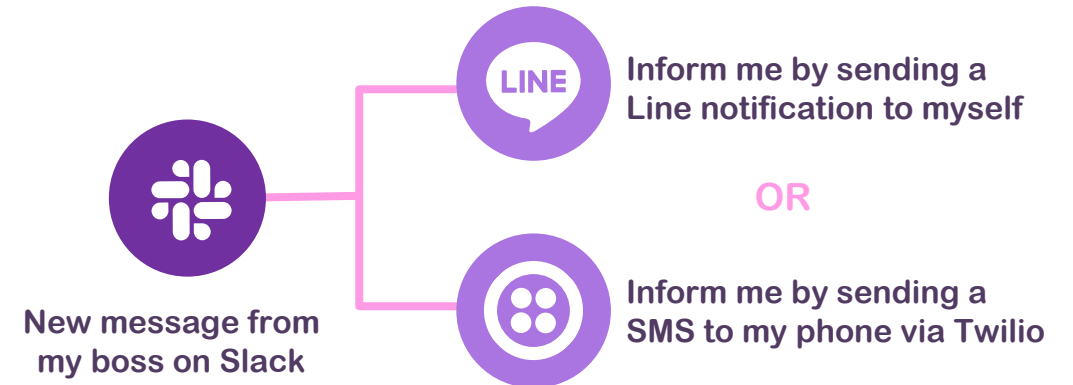

Download a file
from URL

Advanced Miix

Get more work done with fewer miixes with **AND miixes**

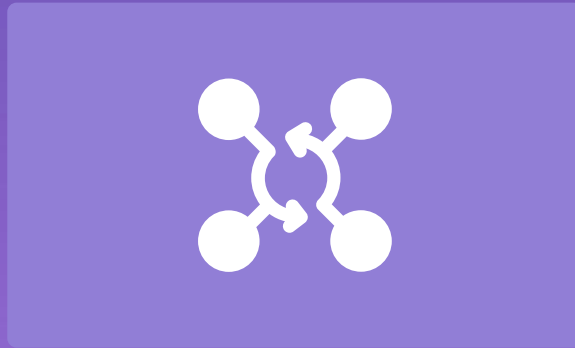

Ensure execution of critical cases with **OR miixes**
